PROFILE

Second-year Bachelor of Commerce in Information Systems student at the University of Johannesburg with interests in software development, databases, data analysis and cloud technologies. My technical foundation includes C#, .NET, SQL, Microsoft SQL Server, Microsoft Excel and Git/GitHub, while I am developing my skills in Python and Microsoft Azure. My long-term goal is to grow towards Data Science, and I am open to internships, learnerships, hackathons and collaborative opportunities where I can build practical experience.

EDUCATION

Bachelor of Commerce in Information Systems - University of Johannesburg

Jan 2025 - Expected Nov 2027 | Current status: Second year

PROJECTS & PRACTICAL EXPERIENCE

UJ Compass | UJ DevSoc Hackathon 2026 | Team Grootman Hacks

- Built a responsive student-support prototype under an approximately two-hour hackathon deadline, covering service routing, trackable support requests, digital queues, accessibility-focused navigation and campus transport information concepts.
- Technologies: HTML, CSS and JavaScript.

[Live demo](#) | [GitHub](#)

SQL Video Games Analysis | SQL | Data Analysis

- Used SQL joins, aggregate functions, grouping and sorting to explore historical video-game sales and critic/user score data and identify patterns.

[GitHub](#)

C# Learning Journey | C# | .NET | Windows Forms

- Built C# exercises and small applications covering object-oriented programming, arrays, inheritance, exception handling, file handling and Windows Forms.

[GitHub](#)

WorkFlow AI | Workplace Productivity Prototype

- Developed during the CAPACITI AI Skills Acceleration Programme with tools for email drafting, meeting summaries, task planning, research support and workspace organization.
- Current deployed version uses transparent local rule-based processing and structured templates, with no paid external AI API required.

SKILLS

Programming & Development: C#, .NET Framework, Windows Forms, basic HTML, CSS and JavaScript

Databases & Data: SQL, Microsoft SQL Server, SQL Server Management Studio (SSMS), database concepts, data analysis and Microsoft Excel

Development & Collaboration Tools: Visual Studio, Visual Studio Code, Git, GitHub and Jira

Currently developing: Python, Microsoft Azure and cloud technologies

Professional: Problem solving, teamwork, communication, research, presentation, critical thinking, time management and attention to detail

CERTIFICATIONS & VERIFIED LEARNING

- Google AI Essentials - Google Career Certificates / Coursera - Completed Aug 2026
- Foundational C# with Microsoft - freeCodeCamp / Microsoft - Completed Aug 2026
- AI Fluency for Students - Anthropic - Completed
- Intermediate Importing Data in Python - DataCamp - Completed Jun 2026
- Artificial Intelligence in the 4IR - University of Johannesburg - Completed
- Advanced Information Literacy - University of Johannesburg - Completed
- Excel for the Workplace - University of Johannesburg - Completed
- Word for the Workplace - University of Johannesburg - Completed
- Presentation for the Workplace - University of Johannesburg - Completed

CURRENT LEARNING & PROFESSIONAL DEVELOPMENT

- Introduction to Programming with Python (CS50P) - Harvard / CS50 - In progress
- Azure Data Fundamentals (DP-900 learning) - Microsoft Azure - In progress
- AI Skills Acceleration Programme - CAPACITI - Professional development completed in 2026

EXPERIENCE

Peer Academic Support - Dinizulu Senior Secondary School | Aug-Nov 2024

- Supported learners with difficult concepts, encouraged participation and helped create a positive learning environment.

ADDITIONAL TOOLS & CAREER INTERESTS

Additional tools: Microsoft Word, Microsoft PowerPoint and Canva

Career interests: Data Science, data analytics, information systems, software development, databases and cloud technologies
