

AZILE GOMOMO

INFORMATION SYSTEMS STUDENT | DATA ANALYTICS - SOFTWARE - CLOUD

Johannesburg, Gauteng | 073 025 3684 | gomomoazile68@gmail.com
github.com/Azile-cell | linkedin.com/in/azile-gomomo-520b33366 | azile-cell.github.io/Azile-portfolio/

PROFILE

Second-year BCom Information Systems student at the University of Johannesburg and Microsoft Certified in Azure Data Fundamentals (DP-900), building practical skills across data analytics, software development and cloud technologies. Experience includes SQL, Excel, Power BI, Tableau, C#/.NET, JavaScript/TypeScript and technical projects developed through hackathons and skills programmes. Demonstrated leadership by forming and coordinating student teams, translating requirements into actionable tasks and driving prototypes toward submission. Currently strengthening analytics for internship opportunities while expanding Python, software development and cloud skills, with a long-term goal in data science.

EDUCATION

University of Johannesburg | Bachelor of Commerce in Information Systems | Jan 2025 - expected Nov 2027

DATA ANALYTICS AND TECHNICAL SKILLS

Data analysis: SQL (joins, aggregation, filtering, grouping, sorting), Microsoft SQL Server, SQL Server Management Studio, dataset exploration, analytical reporting and data interpretation.

Visualisation and spreadsheets: Power BI, Tableau, Microsoft Excel (PivotTables, IF, XLOOKUP, SUMIF), dashboard development, conditional data classification and data storytelling.

Programming and development: C#, ASP.NET Core MVC, Entity Framework Core, Python (developing), JavaScript, TypeScript, HTML/CSS and Next.js.

Tools and platforms: Git/GitHub, Visual Studio, VS Code, Vercel and introductory AWS exposure through hackathon work.

Currently developing: Power BI modelling (PL-300 exam preparation) and Python through Harvard CS50P.

EXPERIENCE AND SELECTED PROJECTS

Incoming Data Visualization Trainee - Excelerate | Remote Internship | Starts 5 Oct 2026

- Selected for Excelerate's remote Data Visualization Trainee internship, with onboarding scheduled for 5 Oct 2026.

Deloitte Australia - Data Analytics Job Simulation | Forage | Tableau | Excel | Sep 2026

- Analysed simulated manufacturing telemetry and built a Tableau dashboard comparing downtime by factory and equipment type.
- Used Excel formulas to classify workplace equality scores in a separate simulated business analysis task; completed as a Forage training simulation, not Deloitte employment.

SQL Video Games Analysis - Independent Project | SQL | Data Analysis

- Queried historical video-game sales and critic/user score data using joins, aggregation, grouping and sorting to investigate trends across related datasets.
- Practised translating analysis questions into SQL queries and comparing results across tables to support evidence-based conclusions.

WorkFlow AI - Workplace Productivity Prototype | Next.js | TypeScript | Vercel | 2026

- Developed and deployed a workplace productivity prototype through the CAPACITI AI Skills Acceleration Programme, organising email drafting, meeting summaries and task-prioritisation workflows.
- Implemented transparent local rule-based processing and reusable templates and deployed the prototype with Vercel.

LEADERSHIP, HACKATHONS AND INNOVATION

UJ Compass - UJ DevSoc Hackathon 2026 | Team Lead, 4-person team | Aug 2026

- Initiated and led a four-person team of first-time hackathon participants, coordinating team formation, registration, communication and GitHub/workspace onboarding.
- Organised the team workflow under a tight deadline and helped guide development of a responsive student-support prototype using HTML, CSS and JavaScript.
- Coordinated presentation responsibilities and helped translate campus-service challenges into support tracking, service routing, digital queues and accessible navigation concepts.

Fikelela - Geekulcha Hackathon Application | Team Lead & Prototype Developer | Sonke Platform | 2026

- Created the team on the Sonke platform, onboarded and invited members, and coordinated completion of the hackathon application requirements.
- Drove creation of the GitHub repository and demo needed for the application and completed the project business canvas describing how the proposed solution would work.
- Independently developed the demonstration prototype while keeping the team aligned on submission tasks and deadlines.

Waterwatch AI - UJ x Vodacom x AWS AI for Africa Challenge | Generative Coders | Hackathon Participant | Johannesburg/Midrand | Oct 2026

- Collaborated on Waterwatch AI, a prototype for helping municipalities identify potential water-network issues and improve reporting, investigation and response to suspected leaks.
- Volunteered to contribute to frontend and UI/UX direction, helping shape the dashboard and an end-to-end workflow connecting residents, municipal operators and field teams.
- Contributed to responsible AI considerations, product research, business positioning and Git/GitHub documentation, including human oversight where AI predictions may be uncertain.
- Worked in a time-constrained team environment using AWS tools, Git/GitHub and VS Code to move from problem definition toward a working hackathon prototype.

Solar Esy - Cisco x WeThinkCode_ She Builds Tomorrow Hackathon | Four-person team | 2026

- Helped shape an AI-assisted electricity-budgeting concept, user flows and prototype development for estimating household electricity consumption and availability until payday.
- Supported the team presentation by responding to questions about the concept and prototype during the Q&A.

Entelect HackIT 2026 | Solo Optimisation Challenge | Sep 2026

- Built and tested a C# challenge solution, used evaluator feedback to improve it, reached 86th on the frozen leaderboard and continued submitting improvements after the freeze.

ADDITIONAL TECHNICAL PROJECTS

ResolveIT - IT Support Ticket Management System | C# | ASP.NET Core MVC | EF Core | SQLite | 2026

- Built create, view, edit and delete ticket workflows with title, description, priority and status handling using ASP.NET Core MVC, Entity Framework Core, Razor views and SQLite.

VOLUNTEER EXPERIENCE

Peer Academic Support - Dinizulu Senior Secondary School | Aug - Nov 2024

- Explained difficult concepts to learners, adapted communication to encourage participation and supported a collaborative learning environment.

PROFESSIONAL DEVELOPMENT PROGRAMMES

CAPACITI AI Skills Acceleration Programme | 5-Day Intensive | 24-28 Aug 2026

- Completed the full five-day intensive during UJ test week, attending training before and after a scheduled university assessment while managing competing academic commitments.
- Built and published a personal technical portfolio, developed the WorkFlow AI prototype, and completed Google AI Essentials through Coursera as part of the programme.

CERTIFICATIONS AND COMPLETED TRAINING

- Microsoft Certified: Azure Data Fundamentals (DP-900) | Microsoft | Sep 2026
- Power BI Data Analyst Course (formal exam) | NEMISA | Sep 2026
- Intermediate Importing Data in Python | DataCamp | Jun 2026
- Foundational C# with Microsoft | freeCodeCamp / Microsoft | Aug 2026
- Google AI Essentials | Google / Coursera | Aug 2026
- AI Fluency for Students | Anthropic | Completed 2026

ONGOING PROFESSIONAL DEVELOPMENT

Microsoft Power BI Data Analyst (PL-300) exam preparation; Harvard CS50 Introduction to Programming with Python (CS50P).
